

# Nationwide House Energy Rating Scheme

## NatHERS Certificate No. 854M62E7M0

Generated on 5 Dec 2023 using FirstRate5: 5.3.2b (3.21)

### Property

**Address** B.301, 77-103 ANZAC PARADE, KENSINGTON, NSW, 2033  
**Lot/DP** -  
**NCC Class\*** Class 2  
**Type** New Home

### Plans

**Main plan** -  
**Prepared by** -

### Construction and environment

<b>Assessed floor area (m<sup>2</sup>)*</b>		<b>Exposure type</b>
Conditioned*	79.2	suburban
Unconditioned*	0	<b>NatHERS climate zone</b>
Total	79.2	56 Mascot AMO
Garage	-	

### Accredited assessor

**Name** Juhi Banerji  
**Business name** Stantec  
**Email** juhi.banerji@stantec.com  
**Phone** +61 2 8484 7182  
**Accreditation No.** DMN/21/2042  
**Assessor Accrediting Organisation** -  
**Declaration of interest** Declaration completed: no conflicts

### National Construction Code (NCC) requirements

The NCC's requirements for NatHERS-rated houses are detailed in 3.12.0(a)(i) and 3.12.5 of the NCC Volume Two. For apartments the requirements are detailed in J0.2 and J5 to J8 of the NCC Volume One.

In NCC 2019, these requirements include minimum star ratings and separate heating and cooling load limits that need to be met by buildings and apartments through the NatHERS assessment. Requirements additional to the NatHERS assessment that must also be satisfied include, but are not limited to: insulation installation methods, thermal breaks, building sealing, water heating and pumping, and artificial lighting requirements. The NCC and NatHERS Heating and Cooling Load Limits (Australian Building Codes Board Standard) are available at [www.abcb.gov.au](http://www.abcb.gov.au).

State and territory variations and additions to the NCC may also apply.

**5.9**  
The more stars  
the more energy efficient

**NATIONWIDE  
HOUSE**  
ENERGY RATING SCHEME <sup>®</sup>

**52.9 MJ/m<sup>2</sup>**  
Predicted annual energy load for  
heating and cooling based on standard  
occupancy assumptions.

For more information on  
your dwelling's rating see:  
[www.nathers.gov.au](http://www.nathers.gov.au)

### Thermal performance

<b>Heating</b>	<b>Cooling</b>
<b>28.2</b>	<b>24.7</b>
<b>MJ/m<sup>2</sup></b>	<b>MJ/m<sup>2</sup></b>

### About the rating

NatHERS software models the expected thermal energy loads using information about the design and construction, climate and common patterns of household use. The software does not take into account appliances, apart from the airflow impacts from ceiling fans.

### Verification

To verify this certificate, scan the QR code or visit <https://www.fr5.com.au/QRCodeLanding?PublicId=854M62E7M0> When using either link, ensure you are visiting [www.FR5.com.au](http://www.FR5.com.au).

\* Refer to glossary.

## Certificate Check

Ensure the dwelling is designed and then built as per the NatHERS Certificate. While you need to check the accuracy of the whole Certificate, the following spot check covers some important items impacting the dwelling's rating.

### Genuine certificate

Does this Certificate match the one available at the web address or QR code in the verification box on the front page?  
Does the set of NatHERS-stamped plans for the dwelling have a Certificate number on the stamp that matches this Certificate?

### Ceiling penetrations\*

Does the 'number' and 'type' of ceiling penetrations (e.g. downlights, exhaust fans, etc) shown on the stamped plans or installed, match what is shown in this Certificate?

### Windows

Does the installed window meet the substitution tolerances (SHGC and U-value) and window type, of the window shown on this Certificate? Substituted values must be based on the Australian Fenestration Rating Council (AFRC) protocol.

### Apartment entrance doors

Does the 'External Door Schedule' show apartment entrance doors? Please note that an "external door" between the modelled dwelling and a shared space, such as an enclosed corridor or foyer, should not be included in the assessment (because it overstates the possible ventilation) and would invalidate the Certificate.

### Exposure\*

Has the appropriate exposure level (terrain) been applied? For example, it is unlikely that a ground-floor apartment is "exposed" or a top floor high-rise apartment is "protected".

### Provisional\* values

Have provisional values been used in the assessment and, if so, noted in "additional notes" below?

## Additional Notes

### Window and glazed door *type and performance*

#### Default\* windows

Window ID	Window description	Maximum U-value*	SHGC*	Substitution tolerance ranges	
				SHGC lower limit	SHGC upper limit
ALM-002-03 A	Aluminium B SG High Solar Gain Low-E	5.4	0.58	0.55	0.61

#### Custom\* windows

Window ID	Window description	Maximum U-value*	SHGC*	Substitution tolerance ranges	
				SHGC lower limit	SHGC upper limit
No Data Available					

### Window and glazed door *Schedule*

Location	Window ID	Window no.	Height (mm)	Width (mm)	Window type	Opening %	Orientation	Window shading device*
Bedroom 2	ALM-002-03 A	Opening 105	2800	2865	sliding	30.0	E	No
Bedroom 5	ALM-002-03 A	Opening 98	2800	797	awning	10.0	E	No
Bedroom 5	ALM-002-03 A	Opening 99	2800	1253	fixed	0.0	E	No
Kitchen/Living 6	ALM-002-03 A	Opening 109	2800	2270	sliding	45.0	N	No
Kitchen/Living 6	ALM-002-03 A	Opening 110	2800	3220	fixed	0.0	E	No

\* Refer to glossary.

Glazed 7	ALM-002-03 A	Opening 115	2800	1515	louvre	50.0	S	No
Glazed 7	ALM-002-03 A	Opening 117	2800	1513	louvre	50.0	N	No

## Roof window type and performance value

### Default\* roof windows

Window ID	Window description	Maximum U-value*	SHGC*	Substitution tolerance ranges	
				SHGC lower limit	SHGC upper limit
No Data Available					

### Custom\* roof windows

Window ID	Window description	Maximum U-value*	SHGC*	Substitution tolerance ranges	
				SHGC lower limit	SHGC upper limit
No Data Available					

## Roof window schedule

Location	Window ID	Window no.	Opening %	Area (m <sup>2</sup> )	Orientation	Outdoor shade	Indoor shade
No Data Available							

## Skylight type and performance

Skylight ID	Skylight description
No Data Available	

## Skylight schedule

Location	Skylight ID	Skylight No.	Skylight shaft length (mm)	Area (m <sup>2</sup> )	Orient-ation	Outdoor shade	Diffuser	Skylight shaft reflectance
No Data Available								

## External door schedule

Location	Height (mm)	Width (mm)	Opening %	Orientation
No Data Available				

## External wall type

Wall ID	Wall type	Solar absorptance	Wall shade (colour)	Bulk insulation (R-value)	Reflective wall wrap*
1	FR5 - Cast Concrete	0.5	Medium		No
2	WGE01 - Ext Concrete Wall with R2.5 Added	0.5	Medium	Glass fibre batt: R2.5 (R2.5)	No
3	WGE01 - Concrete R1.8 Added	0.5	Medium	Glass fibre batt: R1.5 (R1.5)	No

## External wall schedule

Location	Wall ID	Height (mm)	Width (mm)	Orientation	Horizontal shading feature* maximum projection (mm)	Vertical shading feature (yes/no)
Bedroom 2	1	2800	4073	N	0	No
Bedroom 2	2	2800	3721	E	2849	Yes

\* Refer to glossary.

Day 3	1	2800	1553	S		0	No
Night 4	1	2800	1574	S		0	No
Bedroom 5	2	2800	2325	E		0	Yes
Bedroom 5	2	2800	427	N		0	Yes
Bedroom 5	2	2800	649	E		0	Yes
Bedroom 5	1	2800	2512	S		0	No
Bedroom 5	2	2800	1260	S		0	Yes
Kitchen/Living 6	2	2800	2590	N		4185	Yes
Kitchen/Living 6	2	2800	614	E		0	Yes
Kitchen/Living 6	1	2800	1881	S		0	No
Kitchen/Living 6	2	2800	617	E		0	Yes
Kitchen/Living 6	2	2800	440	S		0	Yes
Kitchen/Living 6	2	2800	3362	E		0	Yes
Glazed 7	3	2800	7738	W		0	No
Glazed 7	3	2800	2636	N		0	No
Glazed 7	3	2800	4765	W		0	No
Glazed 7	3	2800	2616	S		0	No
Glazed 7	3	2800	15809	W		0	No
Glazed 7	2	2800	1950	S		1114	Yes
Glazed 7	3	2800	5498	E		0	No
Glazed 7	3	2800	305	S		0	No
Glazed 7	3	2800	3642	E		0	No
Glazed 7	3	2800	2422	N		0	No
Glazed 7	3	2800	2618	E		0	No
Glazed 7	3	2800	239	N		0	No
Glazed 7	3	2800	5109	E		0	No
Glazed 7	2	2800	1974	N		1101	Yes

## Internal wall type

Wall ID	Wall type	Area (m <sup>2</sup> )	Bulk insulation
1	FR5 - Internal Plasterboard Stud Wall	60.2	
2	WGE01 - Concrete R1.8 Added	37.1	Glass fibre batt: R1.5 (R1.5)

## Floor type

Location	Construction	Area (m <sup>2</sup> )	Sub-floor ventilation	Added insulation (R-value)	Covering
Bedroom 2	FR5 - 200mm concrete slab	16.1	Enclosed	R0.0	Carpet
Day 3	FR5 - 200mm concrete slab	5.5	Enclosed	R0.0	Tiles
Night 4	FR5 - 200mm concrete slab	4.7	Enclosed	R0.0	Tiles
Bedroom 5	FR5 - 200mm concrete slab	11	Enclosed	R0.0	Carpet
Kitchen/Living 6	FR5 - 200mm concrete slab	41.9	Enclosed	R0.0	Timber
Glazed 7	FR5 - 200mm concrete slab	83.8	Enclosed	R0.0	Tiles

## Ceiling type

Location	Construction material/type	Bulk insulation R-value (may include edge batt values)	Reflective wrap*
No Data Available			

## Ceiling penetrations\*

Location	Quantity	Type	Diameter (mm)	Sealed/unsealed
Bedroom 2	6	Downlights	100	Sealed
Day 3	2	Downlights	100	Sealed
Day 3	1	Exhaust Fans	200	Sealed
Night 4	2	Downlights	100	Sealed
Night 4	1	Exhaust Fans	200	Sealed
Bedroom 5	4	Downlights	100	Sealed
Kitchen/Living 6	16	Downlights	100	Sealed
Kitchen/Living 6	1	Exhaust Fans	200	Sealed

## Ceiling fans

Location	Quantity	Diameter (mm)
No Data Available		

## Roof type

Construction	Added insulation (R-value)	Solar absorptance	Roof shade
Slab:Slab - Suspended Slab : 200mm: 200mm Suspended Slab	0.0	0.5	Medium

## Explanatory Notes

### About this report

A NatHERS rating is a comprehensive, dynamic computer modelling evaluation of a home, using the floorplans, elevations and specifications to estimate an energy load. It addresses the building layout, orientation and fabric (i.e. walls, windows, floors, roofs and ceilings), but does not cover the water or energy use of appliances or energy production of solar panels.

Ratings are based on a unique climate zone where the home is located and are generated using standard assumptions, including occupancy patterns and thermostat settings. The actual energy consumption of a home may vary significantly from the predicted energy load, as the assumptions used in the rating will not match actual usage patterns. For example, the number of occupants and personal heating or cooling preferences will vary.

While the figures are an indicative guide to energy use, they can be used as a reliable guide for comparing different dwelling designs and to demonstrate that the design meets the energy efficiency requirements in the National Construction Code. Homes that are energy efficient use less energy, are warmer on cool days, cooler on hot days and cost less to run. The higher the star rating the more thermally efficient the dwelling is.

### Accredited assessors

To ensure the NatHERS Certificate is of a high quality, always use an accredited or licenced assessor. NatHERS accredited assessors are members of a professional body called an Assessor Accrediting Organisation (AAO).

Australian Capital Territory (ACT) licensed assessors may only produce assessments for regulatory purposes using software for which they have a licence endorsement. Licence endorsements can be confirmed on the ACT licensing register

## Glossary

<b>Annual energy load</b>	the predicted amount of energy required for heating and cooling, based on standard occupancy assumptions.
<b>Assessed floor area</b>	the floor area modelled in the software for the purpose of the NatHERS assessment. Note, this may not be consistent with the floor area in the design documents.
<b>Ceiling penetrations</b>	features that require a penetration to the ceiling, including downlights, vents, exhaust fans, rangehoods, chimneys and flues. Excludes fixtures attached to the ceiling with small holes through the ceiling for wiring, e.g. ceiling fans; pendant lights, and heating and cooling ducts.
<b>Conditioned</b>	a zone within a dwelling that is expected to require heating and cooling based on standard occupancy assumptions. In some circumstances it will include garages.
<b>Custom windows</b>	windows listed in NatHERS software that are available on the market in Australia and have a WERS (Window Energy Rating Scheme) rating.
<b>Default windows</b>	windows that are representative of a specific type of window product and whose properties have been derived by statistical methods.
<b>Entrance door</b>	these signify ventilation benefits in the modelling software and must not be modelled as a door when opening to a minimally ventilated corridor in a Class 2 building.
<b>Exposure category - exposed</b>	terrain with no obstructions e.g. flat grazing land, ocean-frontage, desert, exposed high-rise unit (usually above 10 floors).
<b>Exposure category - open</b>	terrain with few obstructions at a similar height e.g. grasslands with few well scattered obstructions below 10m, farmland with scattered sheds, lightly vegetated bush blocks, elevated units (e.g. above 3 floors).
<b>Exposure category - suburban</b>	terrain with numerous, closely spaced obstructions below 10m e.g. suburban housing, heavily vegetated bushland areas.
<b>Exposure category - protected</b>	terrain with numerous, closely spaced obstructions over 10 m e.g. city and industrial areas.
<b>Horizontal shading feature</b>	provides shading to the building in the horizontal plane, e.g. eaves, verandahs, pergolas, carports, or overhangs or balconies from upper levels.

\* Refer to glossary.

<b>National Construction Code (NCC) Class</b>	the NCC groups buildings by their function and use, and assigns a classification code. NatHERS software models NCC Class 1, 2 or 4 buildings and attached Class 10a buildings. Definitions can be found at <a href="http://www.abcb.gov.au">www.abcb.gov.au</a> .
<b>Opening Percentage</b>	the openability percentage or operable (moveable) area of doors or windows that is used in ventilation calculations.
<b>Provisional value</b>	an assumed value that does not represent an actual value. For example, if the wall colour is unspecified in the documentation, a provisional value of 'medium' must be modelled. Acceptable provisional values are outlined in the NatHERS Technical Note and can be found at <a href="http://www.nathers.gov.au">www.nathers.gov.au</a>
<b>Reflective wrap</b> (also known as foil)	can be applied to walls, roofs and ceilings. When combined with an appropriate airgap and emissivity value, it provides insulative properties.
<b>Roof window</b>	for NatHERS this is typically an operable window (i.e. can be opened), will have a plaster or similar light well if there is an attic space, and generally does not have a diffuser.
<b>Shading device</b>	a device fixed to windows that provides shading e.g. window awnings or screens but excludes eaves.
<b>Shading features</b>	includes neighbouring buildings, fences, and wing walls, but excludes eaves.
<b>Solar heat gain coefficient (SHGC)</b>	the fraction of incident solar radiation admitted through a window, both directly transmitted as well as absorbed and subsequently released inward. SHGC is expressed as a number between 0 and 1. The lower a window's SHGC, the less solar heat it transmits.
<b>Skylight</b> (also known as roof lights)	for NatHERS this is typically a moulded unit with flexible reflective tubing (light well) and a diffuser at ceiling level.
<b>U-value</b>	the rate of heat transfer through a window. The lower the U-value, the better the insulating ability.
<b>Unconditioned</b>	a zone within a dwelling that is assumed to not require heating and cooling based on standard occupancy assumptions.
<b>Vertical shading features</b>	provides shading to the building in the vertical plane and can be parallel or perpendicular to the subject wall/window. Includes privacy screens, other walls in the building (wing walls), fences, other buildings, vegetation (protected or listed heritage trees).
